LOGLINE

Brother-and-sister investigators Jennifer Johnson and Ryan Oswald enter locations with disturbing histories, combining historical research, modern paranormal equipment and their natural sibling dynamic to uncover what may still be lingering behind.

THE SERIES

Haunted Bloodline follows siblings Jennifer and Ryan as they investigate America's most compelling haunted locations. Each episode moves from the history and reported activity into a hands-on nighttime investigation using spirit boxes, EMF detectors, SLS cameras and controlled experiments.

The scares are never manufactured. They test claims, attempt to debunk what they encounter and follow the evidence wherever it leads. If something can be explained, they say so. When it cannot, the investigation continues.
